

Knowing To Create The Future

	1950	1975	2007	2025	2050
World Urban Population (million)	737	1,518	3,294	4,584	6,398
Percentage	29.1%	37.3%	49.4%	57.2%	69.6%
More Developed Region (million)	427	702	916	995	1,071
Less Developed Region (million)	310	817	2,382	3,590	5,327

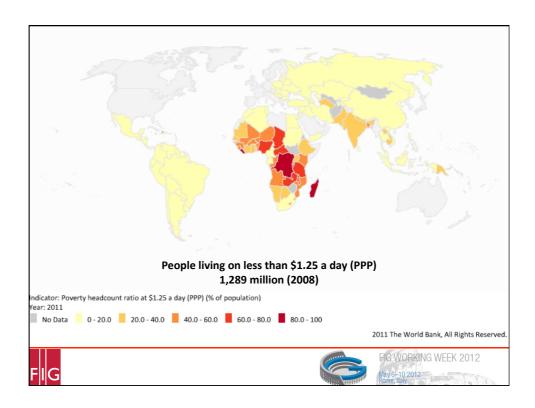

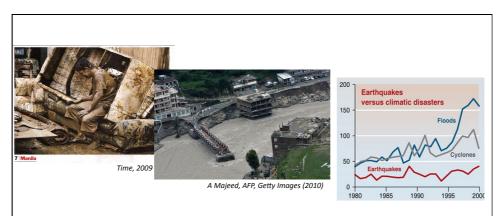

Close to 1 billion people, or 32 per cent of the world's current urban population, live in slums in inequitable and life-threatening conditions, and are directly affected by both environmental disasters and social crises, whose frequency and impacts have increased significantly during the last few decades.

(UN-Habitat, 2009)

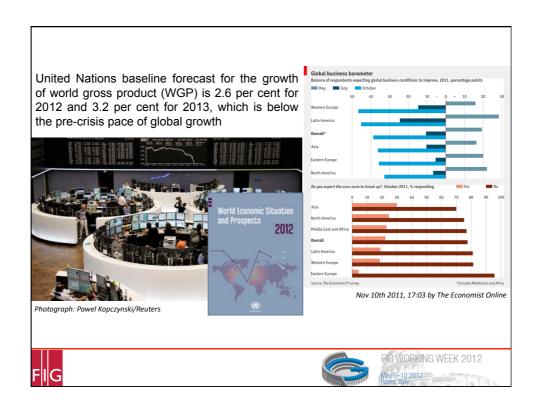

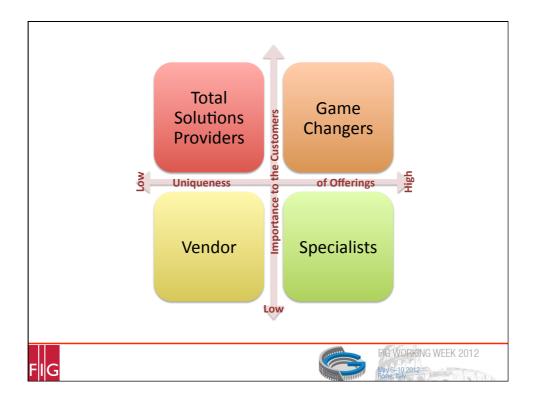

"The most important environmental concern now is climate change". The authoritative Stern Report on the economics of climate change concludes that it will 'affect the basic elements of life for people around the world – access to water, food production, health and the environment'.

(Planning Sustainable Cities: Global Report on Human Settlement 2009 (UN-Habitat)

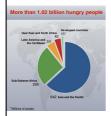

"The rapid advances in geospatial information and technologies, and their easy accessibility, have made such information an invaluable tool in research, policy and business planning and implementation. Across all sectors of society, it is increasingly recognized that the effective use of geospatial information helps address many of the current humanitarian, peace and security, environmental, and development challenges facing the world, such as climate change, natural disasters, disease pandemics, famines, population displacement, food and economic crises, which are of a cross-border nature requiring both global, regional and national policy responses."

(United Nations Secretary General's Report to the UN Economic and Social Council, 2011)

GGIM has a vision to migrate to a paradigm of managing all information spatially
