UN GGCE Geodesy Capacity Development Workshop for the Americas on Transitioning to a Modern Geospatial Reference System

- November 2025 in Santiago, Chile at the ECLAC
- Follows format of preceding Workshops in Europe, AP and Africa
- Target audience:
 - Surveying or geodetic professionals and practitioners
 - Government officials actively involved in technical geodesy
 - Academics and Researchers engaged in geodesy and related fields.
 - Representatives from geodetic organizations

UN GGCE Geodesy Capacity Development Workshop for the Americas on Transitioning to a Modern Geospatial Reference System

- Primary Objectives
 - Communicate the importance of geodesy
 - Provide guidance on modern Geospatial Reference Systems
 - Assist with the development of international geodetic standards
 - Provide guidance on establishing the necessary governance structures
 - Assist development of a Communications and Stakeholder Engagement Plan
