Developments in Finland

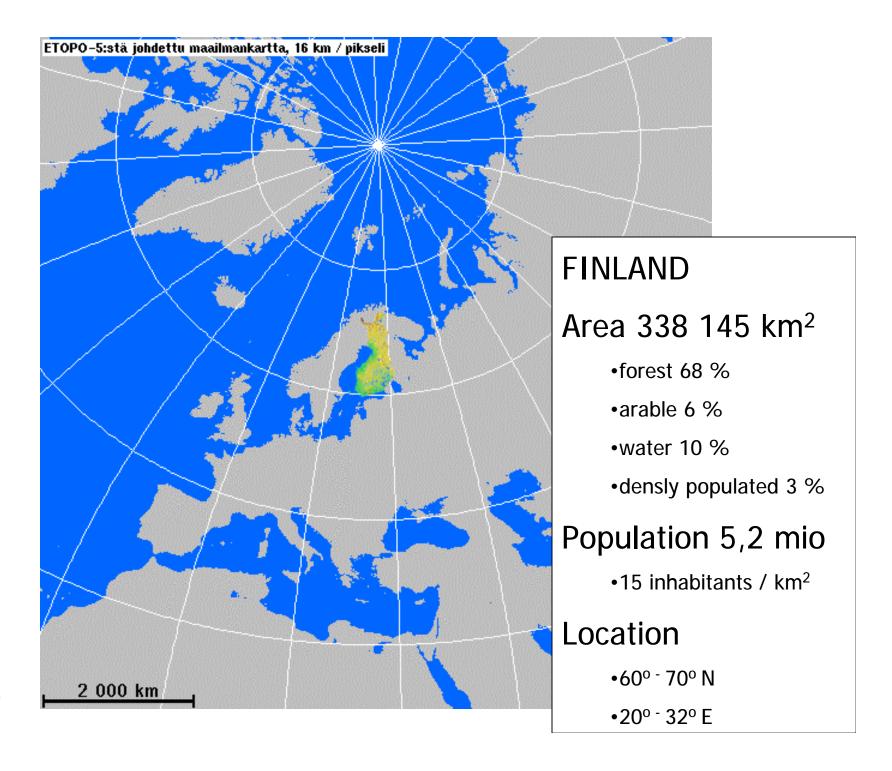

Madison, Wisconsin, USA

Annual Meeting 19-25 June 2005

Mikko Uimonen

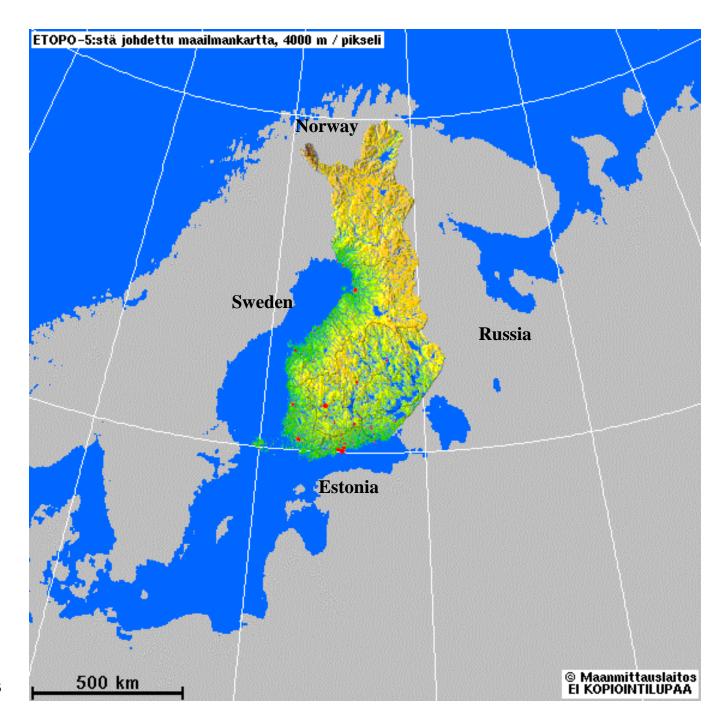

Finland

2002-04-23

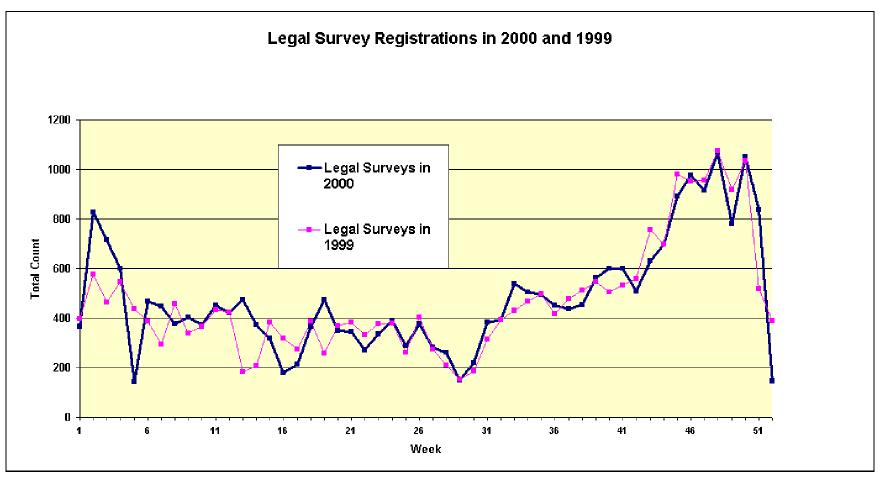

Basic information about cadastre

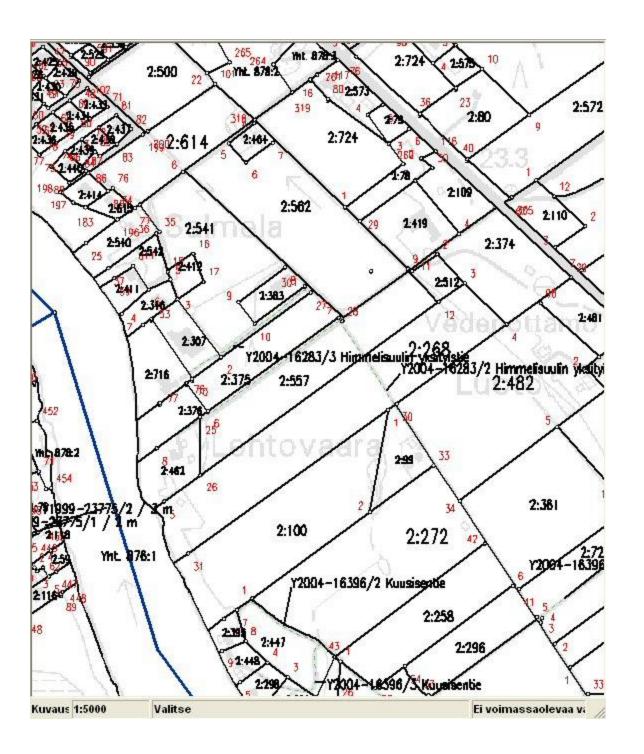

- u 2,84 million basic property units in the cadastre + 0,9 million registered strata (condominium) units
- u title registration system
- u cadastre and cadastral maps 100 % in digital form (in the same database)
- u 24 000 cadastral surveys annually
- u state (NLS) and the biggest municipalities are responsible of the cadastre, local courts keep the land book

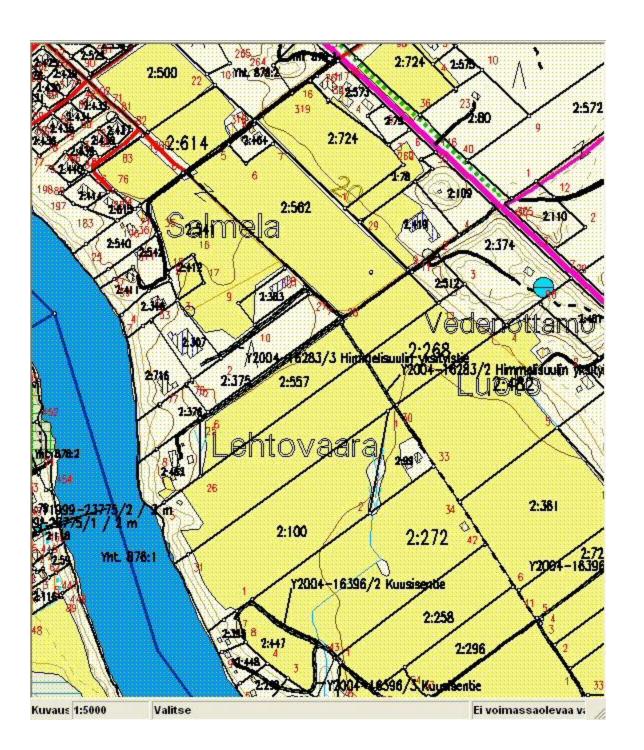

Legal land surveys registered in 2000

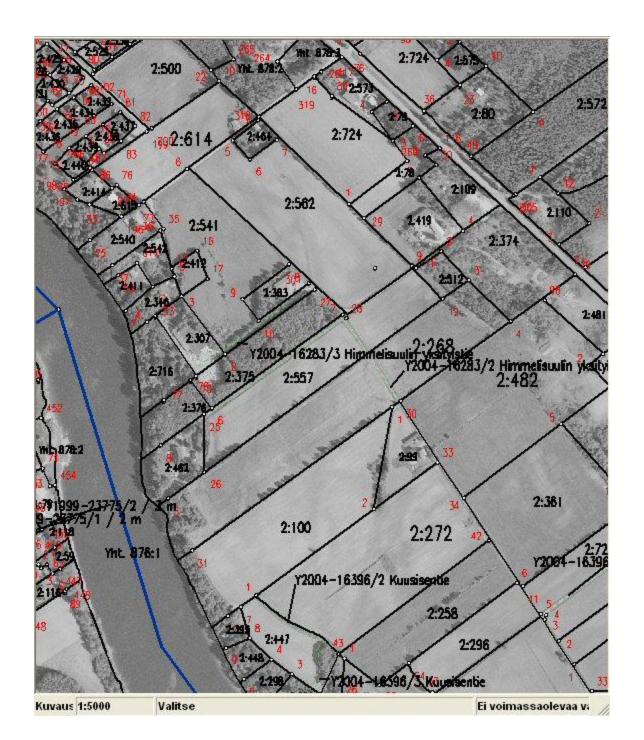

Recent developments in cadastre

- A new cadastral system JAKO introduced in 1998 and developed since then
- Seamless database consisting of maps and attribute data covering the whole country
- u 800 workstations connected to the system
- Covers cadastral information service and conducting of cadastral surveys + valuation
- u Cadastral information consists of the basic data and links to the ownership and mortages. There is also the market price register of the cadastral units.

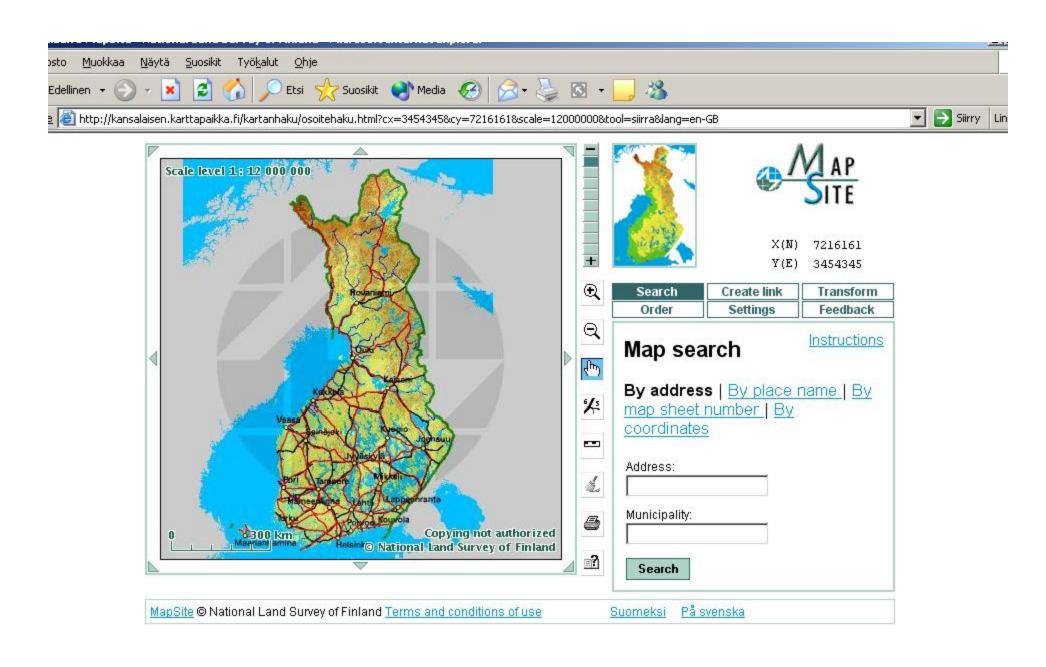

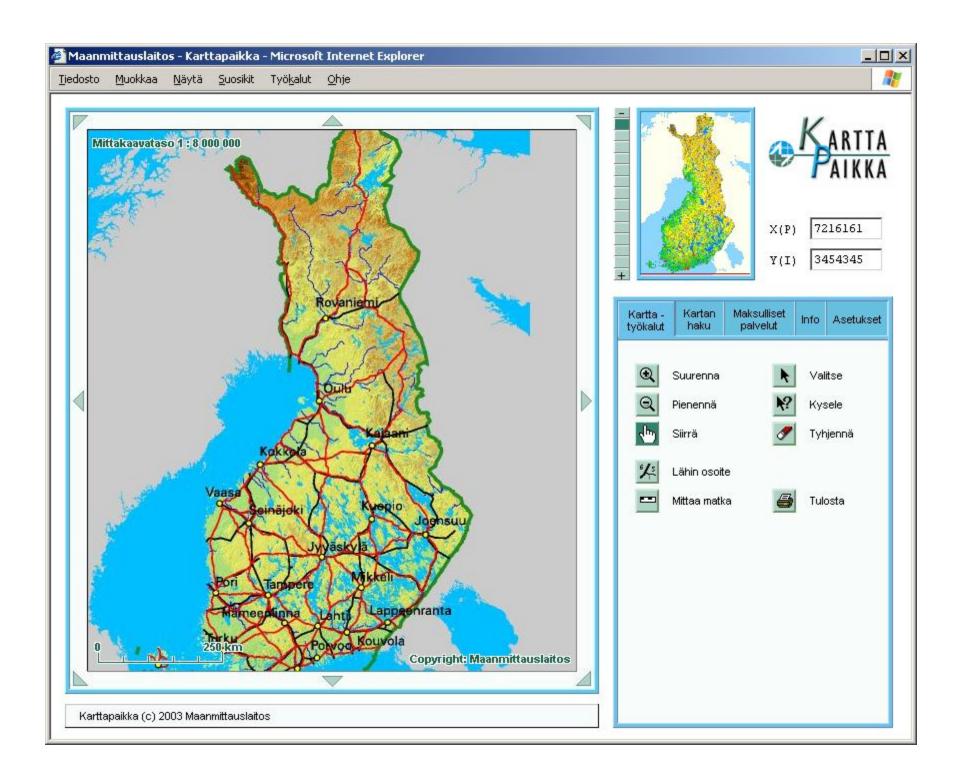

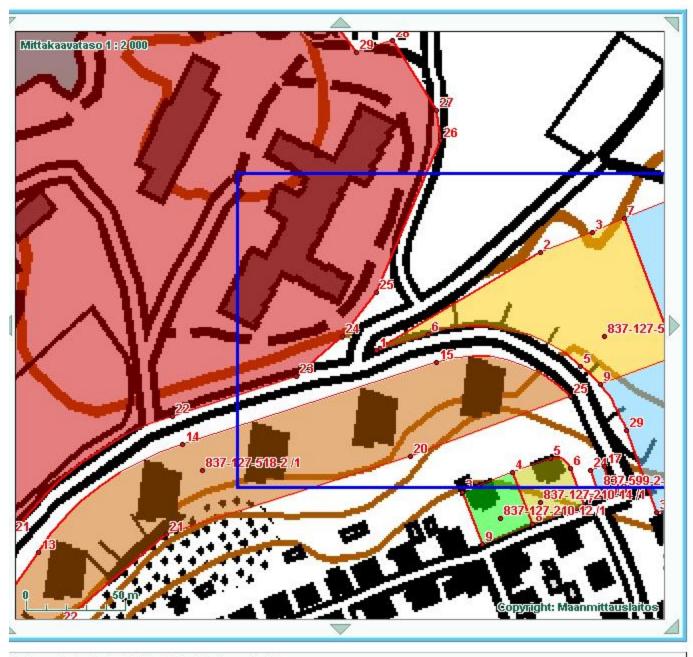

Map Site (WWW)

- CITIZEN'S MAPSITE (1996, 2005)
 - u free of charge
